

## New Strobo Beauty Box

The Strobo Beauty Box is a 38cm (15") beauty box and softbox combination designed for off camera flash. The white interior combined with the suspended inner baffle and outer mask give off a hard beauty light with a unique fall off. This is in contrast to the soft light that is created when the mask is replaced by the outer diffuser, giving two distinctive lighting techniques in one versatile product.

This collapsible and fully portable Beauty Box is quick to set up and take down and is perfect for studio and location photography, incorporating the versatile Ezybox Hotshoe Bracket MKII.
