

New Ezybox Quad Bracket

The ultimate flashgun bracket. Whether you are looking for more power or a faster recycling time from your flashguns, the new Ezybox Quad Bracket is the perfect solution. Simply attach up to four flashguns to the bracket then attach one of our Ezybox Studio softboxes or umbrellas (compatible with 8mm or 10mm shaft sizes) to create a beautifully diffused light. The Ezybox Quad Bracket can be used in conjunction with various flashgun triggering systems utilising one of the accompanying PC cables that allow you to connect four flashguns to a single receiver (PC connection or 3.5 jack connection).

The Ezybox Quad Bracket is available separately or in one of three Ezybox Softbox Quad kits. Umbrellas can be purchased separately.

The Ezybox Quad Bracket is Nikon SB-900 compatible.
