

## New Hotrod Strip Softboxes

In addition to our traditional square Ezybox Hotshoe softbox we have now introduced the Hotrod strip softbox for use with battery operated flashguns. It is available in two different sizes and features an inner diffusion panel and an adapter plate with rods. The flashgun simply slides into a shoe mount attached to the adapter plate.

The Hotrod Strip softbox produces a narrow band of light, useful for creating side lighting for full length fashion or portraits or for a soft hair light. The narrow profile also allows for achieving elongated catch lights in product photography.

### Specifications

Description	Code
<b>NEW</b> Hotrod Strip Softbox 30cm x 120cm (12" x 48")	2630
<b>NEW</b> Hotrod Strip Softbox 40cm x 120cm (16" x 48")	2640
