

## New Ezybox Hotshoe Accessories Non Rotating Handle, Waist Holder & Small Handle

The Lastolite Non-Rotating Extending Handles are made of sturdy yet lightweight aluminium tubes with metal collars. The handles are available in two sizes, 70cm - 176cm and 74cm - 232cm. The non-rotating sections allow accessories such as the Ezybox Hotshoe to be securely held at any angle or position on the handle without the risk of the tubes rotating. An adjustable waist holder is also included.

Also now available is the Small Handle (15cm) with spigot and hotshoe connector ideal for battery operated flash, Ezybox Hotshoes and Ezybox Speedlite.
