

New Quad Bracket

The ultimate flashgun bracket. Whether you are looking for more power or a faster recycling time from your flashguns, the new Quad Bracket is the perfect solution. Simply attach up to four flashguns to the bracket then attach up to two 8mm or 10mm shaft size umbrellas to create a beautifully diffused light. The Quad Bracket can be used in conjunction with various flashgun triggering systems utilising one of the accompanying PC cables that allow you to connect four flashguns to a single receiver (PC connection or 3.5 jack connection).

The Quad Bracket is Nikon SB-900 compatible.
